Kokomo
Fodder Beet

**THE NEW BEET ON THE BLOCK
(14-16% DM)**

MAXIMISE YOUR WINTER FEED YIELDS

DESCRIPTION

Kokomo (OE968) is a new mono-germ fodder beet variety available to the New Zealand market this season and has a similar breeding background/parentage to Dynamo but with a slightly higher bulb dry matter percentage range of 14-16%. Kokomo has a large red tankard shaped bulb that sits approximately 50%+ above the ground with good disease and bolting tolerance. The crop can be grazed in-situ by all stock types.

BENEFITS

- ▶ Latest fodder beet genetics available
- ▶ Consistently high yielding in all on-farm trials to date
- ▶ Large top growth
- ▶ Seed is pelletised with world leading technology and coated with insecticide and/or fungicide-only options
- ▶ Available in handy 50,000 seed units

AGRONOMIC TRAITS

| | |
|-------------------------------------|------------------|
| SOWING SEASON | Spring |
| SOWING RATE (seeds/ha) | 80,000 - 100,000 |
| MATURITY (days to graze) | 200+ |
| BULB PERCENTAGE ABOVE GROUND | +/- 50% |
| DRY MATTER % | 14-16% |
| BOLTING TOLERANCE * | Very good |
| DISEASE TOLERANCE * | Very good |

** Subject to management and climatic conditions*
